

HTCIA REGIONS -2010

1. Service to the membership and the chapter
2. Development of a foundation for future regional training events

To better serve the membership and the chapters, a regional scheme is being implemented. This concept is not new to HTCIA having first been implemented in 1999 by than President Joe Chiamonte. This regional scheme divides the HTCIA chapters in the United States into eight regions. All states are accounted for under this division. The rest of the world is currently divided up into six regions. Each region will be the responsibility of an IEC member. In that regard, the IEC member will be responsible for servicing the needs of the chapters in their assigned regions. IEC

UNITED STATES AREA (Eight Regions)

NO.	REGION	CHAPTERS INCLUDED	STATES COVERED	IEC MEMBER
